

Why CTS Metro Fiber Services?

When we supply your last-mile connectivity, CTS Metro Fiber Services provides businesses, universities, healthcare, government and other organizations with:

- State of the art Telecommunications Infrastructure
- Dedicated Internet Access, Fiber Optic Broadband and Ethernet VPN Services
- A carrier-grade, Fiber Optic Metropolitan-area Network
- Easy access and a wide variety of services and solutions
- Readily available, low-cost access to nearly unlimited bandwidth with stunning speed and flexibility

Capacity

- Organizations using CTS Metro Fiber Services are achieving speeds of 10 **MB**, with potential for even greater speed
- Circuits are more than 6 times faster than a T-1 connection
- One hop and 2 **MILLISECONDS** from the national network POP (via multiple carriers)

Flexibility

- Companies can set up facilities whenever and wherever they are most convenient and can easily change or move facilities
- High-end, single-mode fiber meeting high data transmission requirements

Security

- 24 x 7 network monitoring and repairs
- Protection against tampering and accidents
- Central, secure geographic location, free from geographic disasters and geopolitical concerns
- Buried underground with municipal utilities/operations
- Ringed Backbone Network, so data continues moving even if there is a break or cut in the cable

Cost Savings

Why CTS Metro Fiber Services?

- CTS Metro Fiber Service provides virtually unlimited GIG service for affordable rates
- Average competitor's cost for 1-GIG Service typically is much more expensive
- Flat –rate pricing with no per-mile charges
- Readily available, low-cost, high-speed connectivity and transmission of limitless amounts of information
